About Us

SouthWest Water Company provides essential water and wastewater services to more than a million Americans in four states. In business for more than 50 years, we provide a broad range of operation, maintenance and management services, including domestic water production, treatment and distribution; wastewater collection and treatment; customer service; and construction management of utility infrastructure projects.

Our water will help your career grow. The safety of our drinking water and responsible treatment and management of wastewater are critical issues in today's world. For years to come, the water and wastewater business will need people like you--dedicated professionals who want to help protect this precious resource.

We're proud of our work. Daily, we make a difference in the lives of a million people by providing them with water and wastewater services. Build yours and our planet's future with SouthWest Water Company. Don't wait. The opportunity is now.

Certification: Water/Wastewater Certification not required, but is beneficial.

Education and Experience: High School education or equivalent is required and 1-2 years in mechanical or electrical troubleshooting and repair or construction.

Other Requirements: Must follow all company safety practices and procedures. Basic computer skills.

Compensation: Average position compensation is \$25/hr based on experience. Excellent benefits.
