Lunch will be provided

Presentations include:

Belzona Alabama– Repair, protection & reliability solutions to extend asset life and reduce downtime in water and wastewater facilities.

We offer a wide range of epoxy-based repair composites and coatings to repair and protect water and wastewater treatment facilities and equipment from common problems occurring in the industry, including erosion, corrosion, chemical attack, mechanical damage as well as, leaks.

Krebs Engineering –

This presentation highlights key engineering principles for reliable and cost-effective wastewater pump station design.

Topics include capacity evaluation, pump selection and wetwell sizing, corrosion protection and coatings, electrical and SCADA integration, and bypass planning.

Attendees will gain practical insights to improve performance, resiliency, and long-term asset management.

Morrow Water –

Hands-on demonstration of pump maintenance & applications.

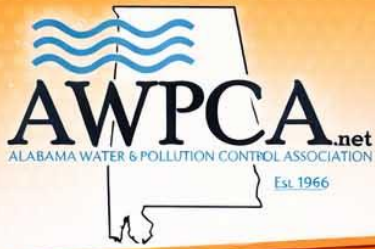

A Pump trailer will be onsite that will have every type of pump including, submersible, vertical turbine, split case, end suction, multistage, sewage & grinder pumps.
